Quality declaration

MANN-FILTER stands for the highest quality standards

For over 65 years MANN-FILTER has been offering the highest standard of original equipment expertise. All products are manufactured in accordance with the latest international automotive-industry production and testing standards. The certification of our production plants worldwide to IATF 16949 requirements ensures uniform quality standards around the globe: original equipment quality. All of our products undergo numerous checks at all stages of production and 100 % final inspection.

The broad range of quality awards received from numerous customers and the international brand awards we've garnered bear witness to our high quality standards. Whether in the original-equipment or yellow-green packaging, whether for cars, trucks or off-highway applications, and whether air, oil, fuel or cabin air filters: people worldwide rely on original MANN-FILTER products in 100 % original equipment quality.

MANN-FILTER – Perfect parts. Perfect service.
